EXPERIENCE

User Interface Designer Kurobi.app

June 2021 – Present

Designed and developed the user interface and frontend of a range of product for kurobi's 1:1 video platform

User Interface Designer bird.money

Aug 2020 – Present

Currently contributing to Bird's mission of redesigning a highly profitable user behaviour prediction product market in a more sustainable, ethical and most responsible manner. My area of specification is developing the interfaces of the core applications ranging from web, mobile to desktop apps

Product Designer TradeDepot Ltd

Jan 2017 – Dec 2020

I led the product design of a retail-focused e-commerce platform serving retails across the country, my workflow includes defining requirements for upcoming features with stakeholders, building flows, prototypes, creating follow-ups for engineers and conducting Design QA

Designing of an exclusive invite-only, offline first retail platform, where together with the team designed new group checkout flow and few crucial membership features. The results were a more compelling product covering the main customer's needs.

Tools and Technologies used include but not limited to Sketch

Illustrator Zeplin, Principle, HTML5, CSS3, SASS, JavaScript, React

EDUCATION
